COVID-19 TESTING GUIDE

Do you have symptoms of COVID-19?

YES

Get tested 3-5 days after last known exposure and stay away from others while you wait for a test result. The CDC recommends that anyone with symptoms of COVID-19 get tested, regardless of vaccination status or prior infection.

NO

Have you been in contact with someone who has confirmed or suspected COVID-19?

YES

NO

You do not need to get tested at this time.

Have you been fully vaccinated?

NO

YES

Have you tested positive for COVID-19 within the past 3 months and recovered?

YES

NO

Get tested 3-5 days after last known exposure. Wear a mask in public settings for 14 days after your last exposure or until you receive a negative test result.

Get tested 3-5 days after last known exposure. Stay home for 14 days after your last exposure and watch for emerging symptoms such as fever (100.4 F), cough, and shortness of breath. If possible, isolate yourself from other household members.

If an employee tests positive and was in close contact with vaccinated staff, does the staff need to go home before they are tested?

No, the vaccinated staff need to be tested 3-5 days after last known exposure. However, if anyone becomes symptomatic they need to get tested and stay home until results post.
