

The Outlook for the US Economy; North Carolina & Asheville | Buncombe County Travel Sector

March 2023 Prepared for:

Zeek Coleman
Vice President, Americas
Tourism Economics
Zcoleman@OxfordEconomics.com

National travel spending above 2019 levels for 5th consecutive month

National Travel Indicators

January 2023

Travel Spending (Tourism Economics)

→ +3.6%

January vs. 2019

Air Passengers (TSA)

≠ +3.3%

January vs. 2019

Overseas Arrivals (NTTO)

√ -33.3%

January vs. 2019

Hotel Demand (STR)

→ +0.6%

January vs. 2019

Short-term Rental Demand (AIRDNA)

→ +39.2%

January vs. 2019

And there's plenty of momentum across various industry metrics

Travel spending in NC is above the national average

Travel Spending (% change vs 2019)

North Carolina vs U.S. total

Source: Tourism Economics

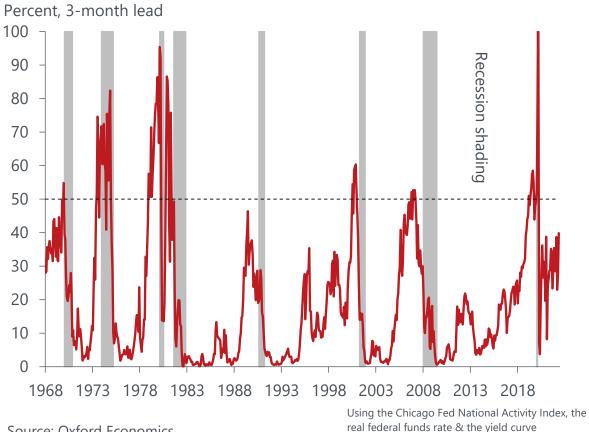

- 1 Are we still headed for a recession?
- 2 How does this usually work?
- 3 Is this time different?

Some Oxford indicators didn't see a near term recession in Q4 of 2022

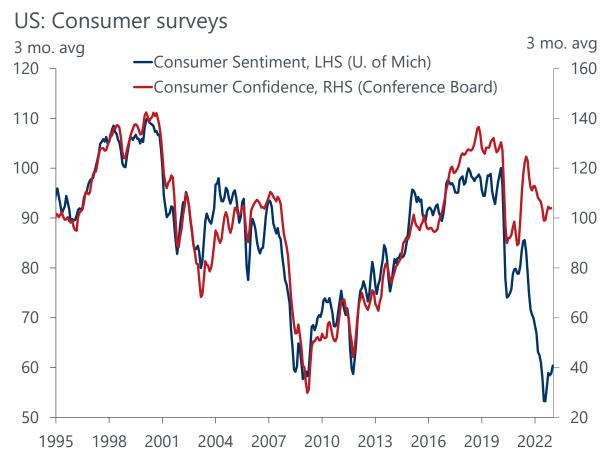

US: Probability of a recession 3 months ahead

Source: Oxford Economics

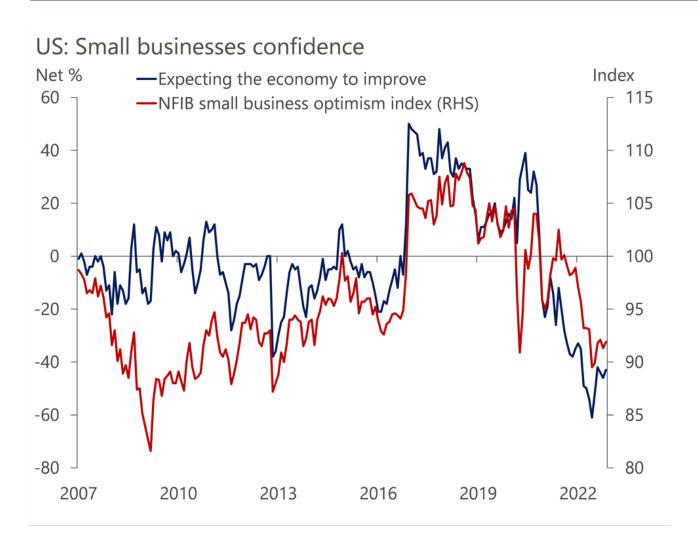

Yet, consumers are feeling uneasy

Source: Oxford Economics/Haver Analytics

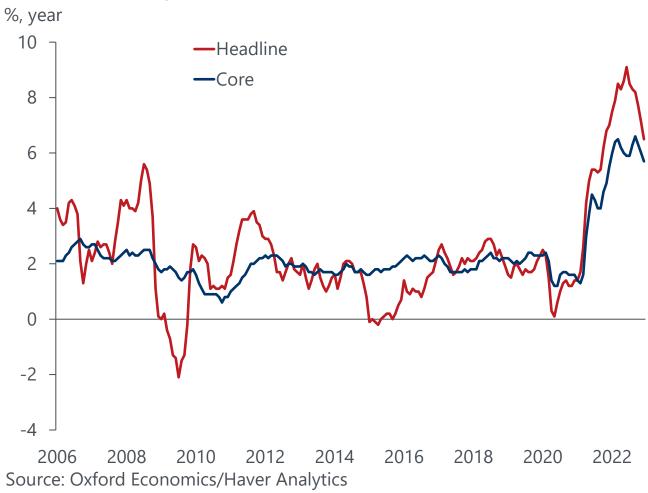

Small business optimism remains low

The culprit? Inflation

US: Consumer prices

Headline (6.5%)

 The average household is spending an additional \$400/month to buy the same goods and services as last year.

...Interest rate hikes will continue

Housing market is already in recession

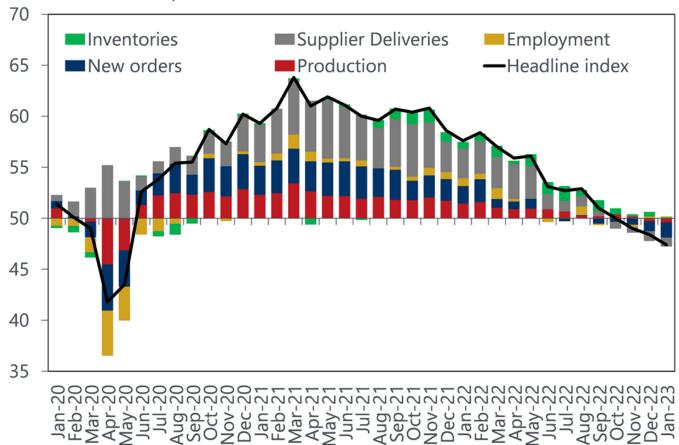

Manufacturing has also entered downturn territory

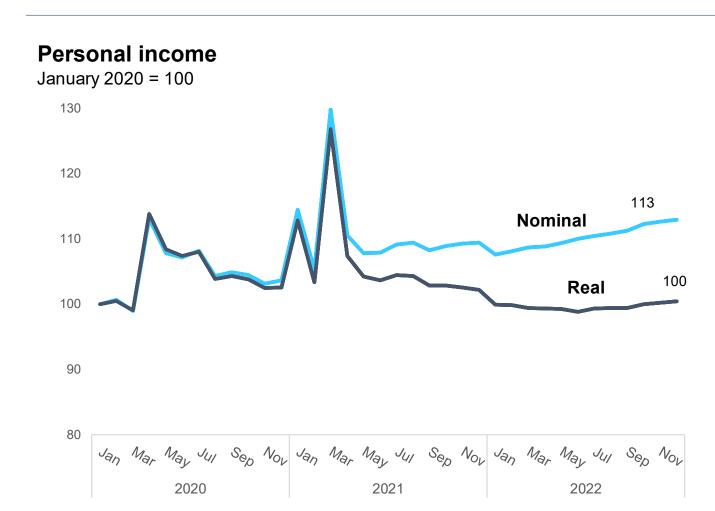

US: Contribution to headline ISM Manufacturing

Index; above 50=expansion

Inflation has taken a bite out of disposable income

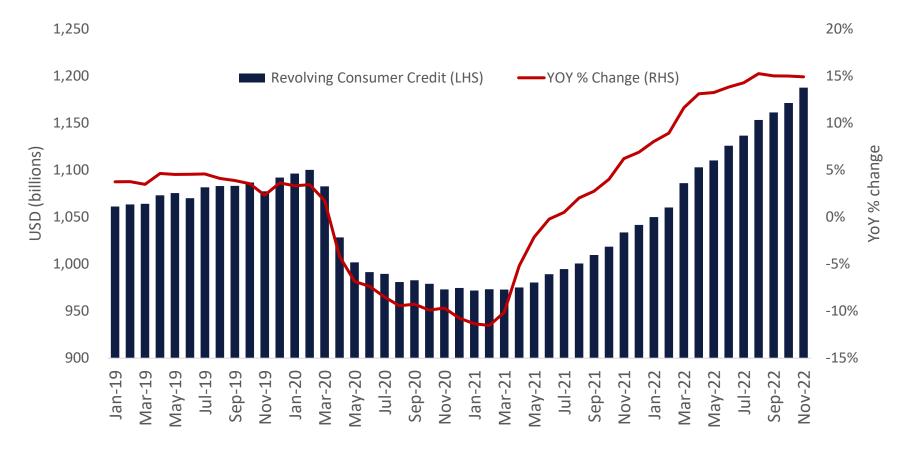

Note: Disposable personal income, seasonally adjusted

Source: BEA; FRED

And households are taking on more debt

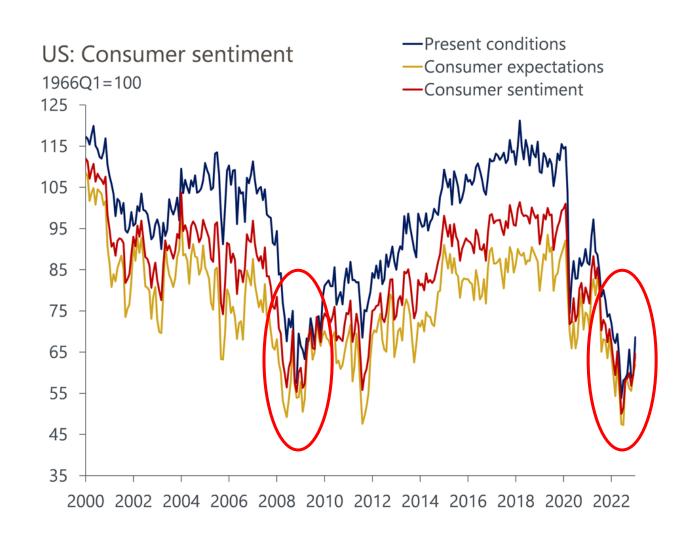

US: Revolving credit has surpassed pre-pandemic levels

Oxford Economics/Haver Analytics

Consumers feeling uneasy

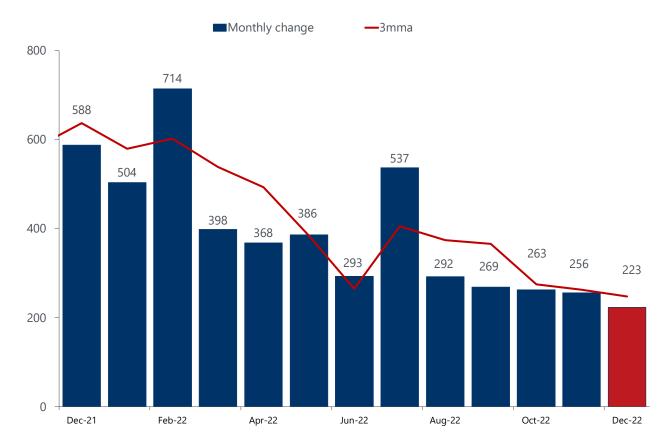

US Job growth continues at a more tempered pace

US: Nonfarm payroll employment

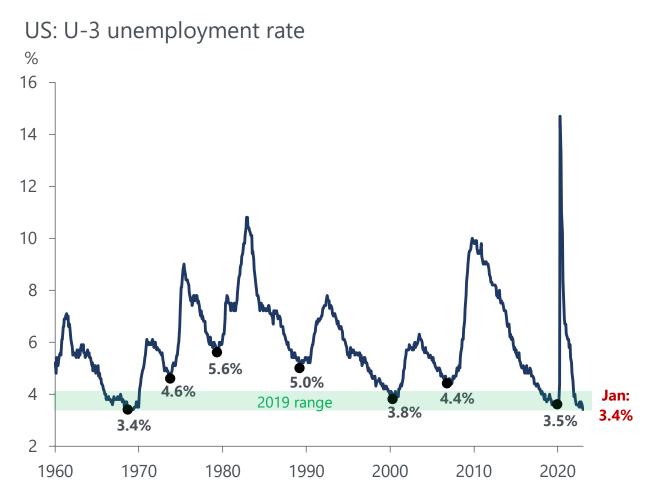

Thousand

Unemployment rate the lowest in 50 years

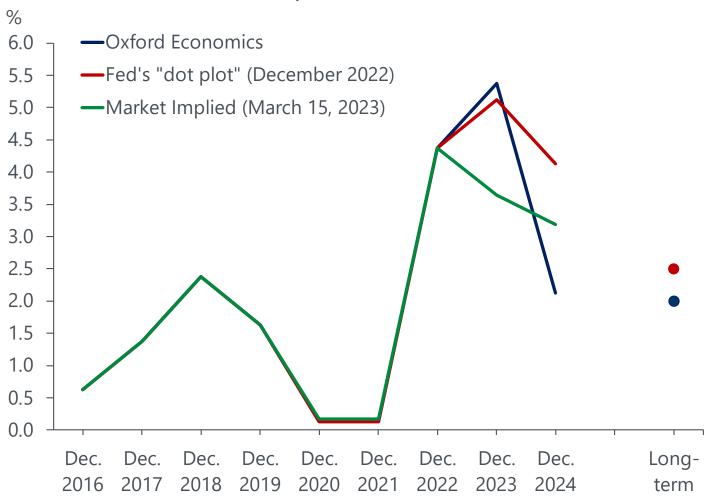

And the Fed has been dialed in on its core mission

US: Federal funds rate expectations

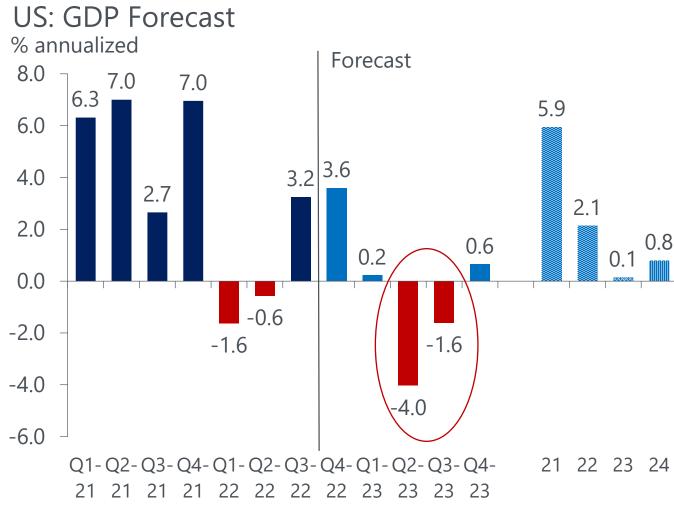

The Fed raised interest rates by 75bps for a fourth consecutive meeting in November, lifting the target range for the fed funds rate to 3.75% to 4.00%.

The Fed signaled that the pace of rate hikes may slow as it assesses the cumulative impact of 375bps of rate hikes, which will affect inflation and the economy with a lag.

Source: CME/Federal Reserve/Oxford Economics

We are headed toward a recession in Q2

Why?

- Persistently high inflation
- Aggressive Fed monetary policy tightening
- Negative spill-over effects from slower global activity
- Weaker corporate earnings

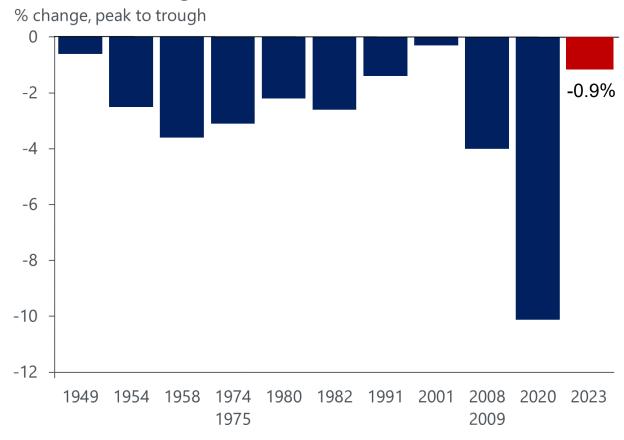

...will weigh on consumers' and businesses' willingness to spend

Source: Oxford Economics/Haver Analytics

The recession will be mild by historical standards

Source: Oxford Economics/Haver Analytics

Unemployment will reach 4.7%

Why so mild?

- Household balance sheets are in great shape and debt service burdens are low.
- Nonfinancial corporate balances are strong.
- State and local governments are flush with cash.

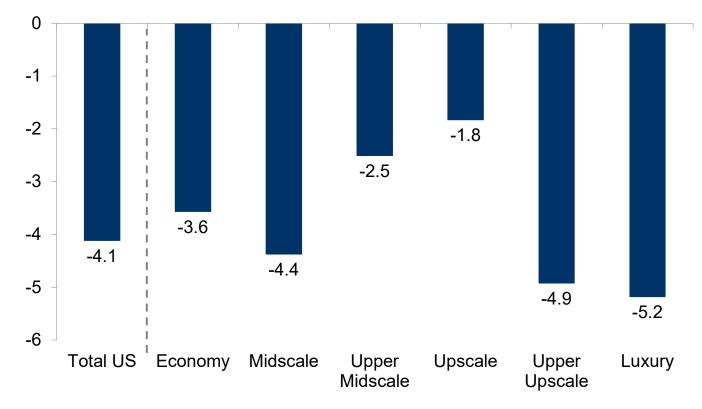

- 1 Are we still headed for a recession?
- 2 How does this usually work?
- 3 Is this time different?

What is the usual relationship?

Hotel demand response to GDP during recessions

% change in room demand from -1% change in real GDP, 1987-2019

Over the past three recessions (not counting 2020), hotel demand fell on average 4x the rate of GDP.

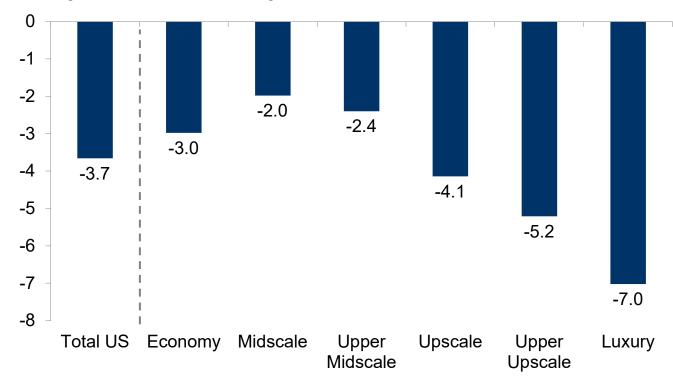

Source: Tourism Economics

Rates react most at the top end

Hotel ADR response to GDP during recessions

% change in ADR from -1% change in real GDP, 1987-2019

For every 1% drop in GDP, total ADR falls
3.7% while high-end properties are impacted the most

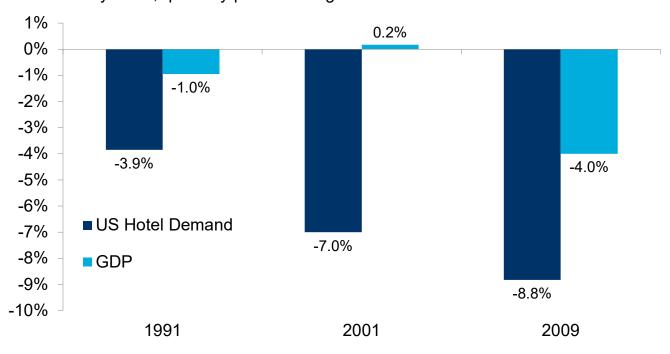

Source: Tourism Economics

What have the last three "normal" recessions looked like?

Hotel demand during recessionary periods

Year-over-year %, quarterly peak-to-trough

Quite a bit of variation is evident in the GDP-hotel room demand relationship

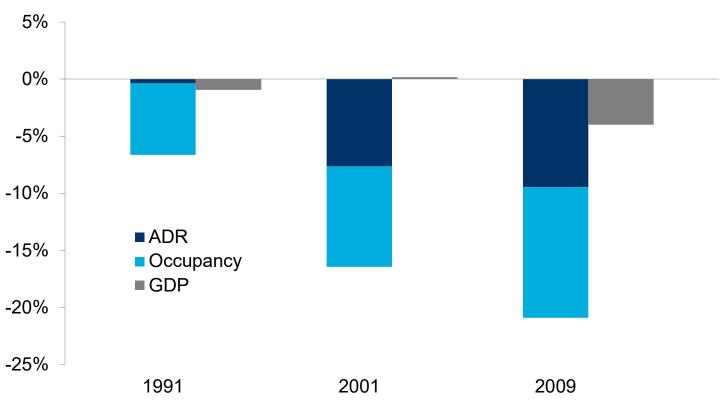

Source: STR, BEA

Overall performance (choose your own adventure)

Hotel performance during recessionary periods

Year-over-year %, quarterly peak-to-trough

Quite a bit of variation is evident in the GDP-hotel room demand relationship

Air travel has now fully recovered

Air Passenger Volume

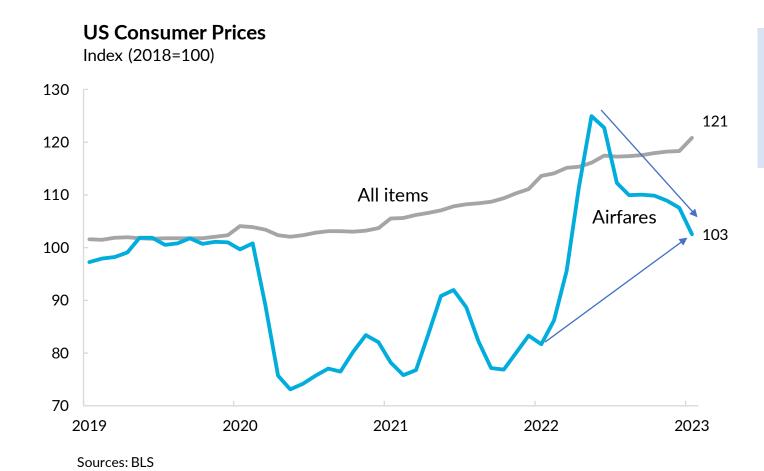

% of 2019 level

Source: TSA

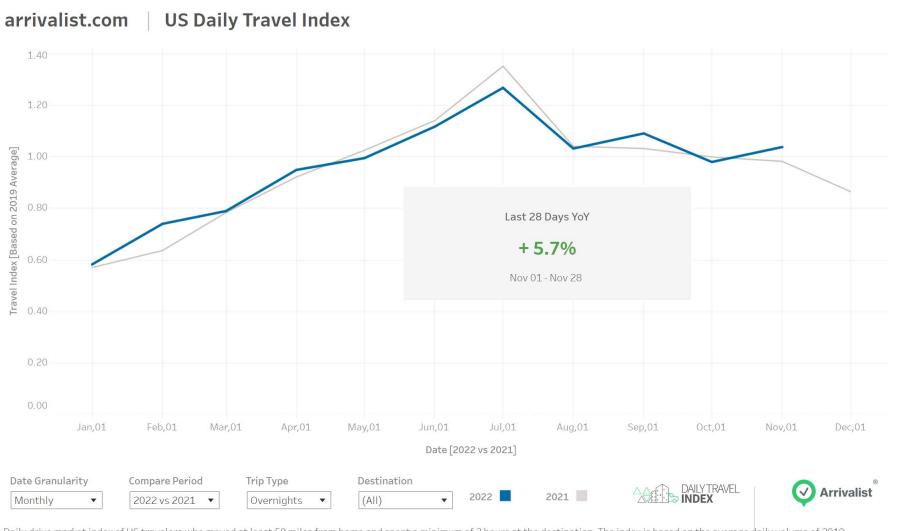

Airfares continue to fall from record highs

- Airfares in December were 18% below May 2022 peak.
- However, prices were 26% higher than a year earlier.

Auto travel still just fine

"In a normal world, 60% of our business is fly and 40% of it is drive. In the second quarter, we think it was 33% fly and 67% drive."

Hilton earnings call, July 27

Daily drive market index of US travelers who moved at least 50 miles from home and spent a minimum of 2 hours at the destination. The index is based on the average daily volume of 2019 travelers.

Why the travel sector will prevail

- 1 No signs of weakness yet!
- 2 US households are in a position of strength

Household balance sheets remain strong

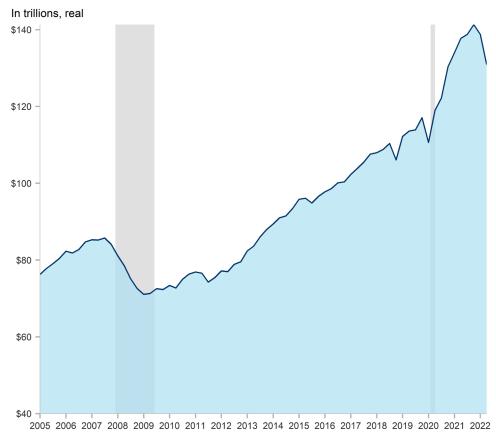

Household debt service

Financial obligations as ratio to disposable income

Note: Quarterly data through 2022Q2. Financial obligations ratio is the ratio of household debt payments, and payments such as rent and auto leases, to disposable income. Source: Federal Reserve, NBER

Household net worth

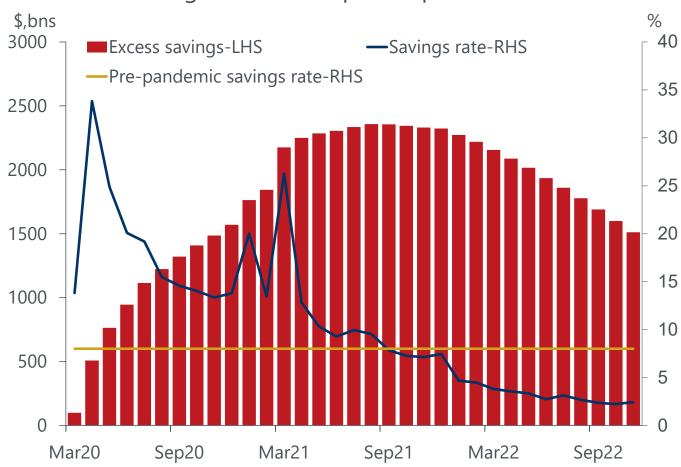

Note: 2020 dollars. Quarterly data through 2022Q2. Net worth of households and nonprofit organizations. Measures assets such as housing and financial assets, minus liabilities. Source: Federal Reserve, NBER

Excess savings are buffer

US: Excess savings based on reported personal income data

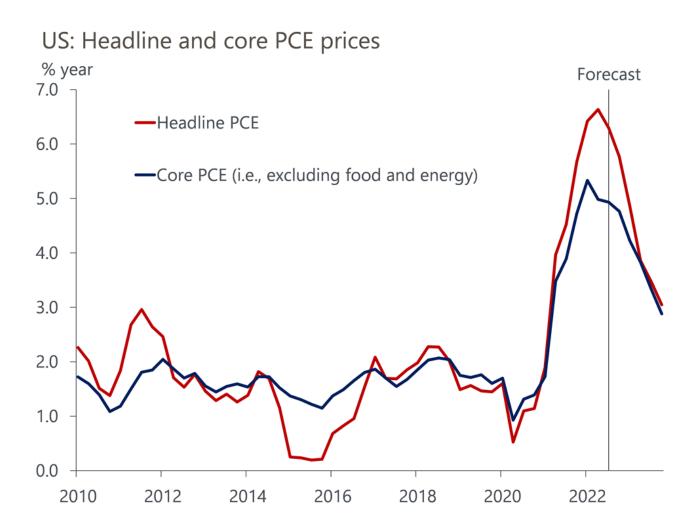

"While macroeconomic concerns continue to dominate the headlines, we are not seeing any signs of weakness in our business. ...consumers still have \$1.7 trillion in excess savings, with the majority concentrated in the top income brackets which gives us confidence the **recovery in the lodging industry** is sustainable."

- Host earnings call, November 3, 2022

Expect inflation to slow in the coming months

"We continue to see that people are prioritizing travel over just about everything.

"Maybe it's still the effect of COVID and people realizing there's more valuable things to do with their lives."

Expedia earnings call, February 9, 2023

(Remarks edited for clarity)

Why the travel sector will prevail

- 1 No signs of weakness yet!
- 2 US households are in a position of strength
- 3 Pent-up demand and prioritization of travel is real

"While we are mindful of macroeconomic headwinds, the travel sector is experiencing a countercyclical recovery. Global demand is continuing to ramp as consumers shift spend to experiences, businesses return to travel, and international markets continue to reopen."

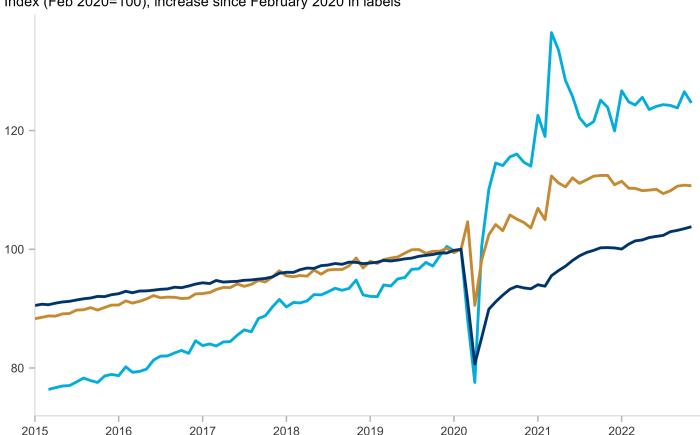

- Delta CEO Ed Bastian, October 13, 2022

Spending continues to rise... for services

Consumer spending, real

Index (Feb 2020=100), increase since February 2020 in labels

Durable goods: +24.7% (cars, furniture, recreational goods, etc.)

Nondurable goods: +10.7% (food, clothing, gas, etc.)

Services: +3.8%

Consumer spending on services is currently 66% of total consumption. It is normally closer to 70%.

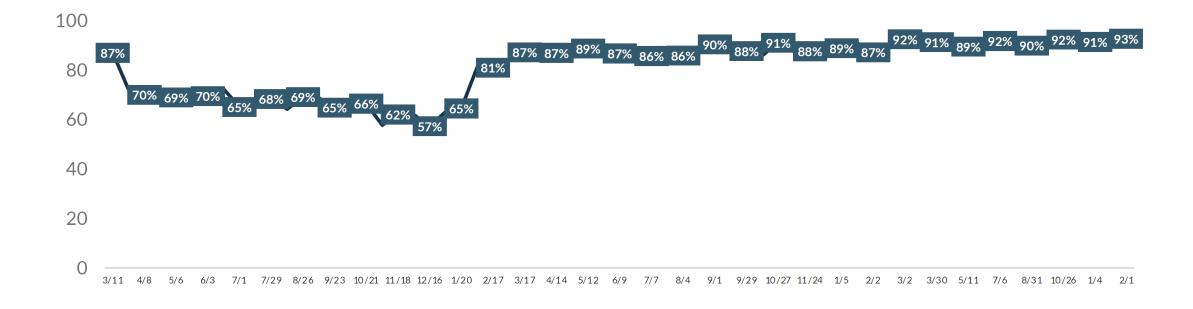

Normalization implies further growth for travel.

Note: Real. Seasonally adjusted monthly data through November 2022 Source: Bureau of Economic Analysis

And overall intentions to travel remain elevated

Travelers with Travel Plans in the Next Six Months Comparison

HOTEL REVENUE HAS BEEN ABOVE 2019 LEVELS SINCE JULY 2021

Hotel revenue

% change relative to 2019

Summary

1 A mild recession is likely in 2023

Inflation and higher interest rates will leave a mark, but strong balance sheets should limit the downside

Usually, this would imply a substantial retrenchment in travel

The 1% drop in GDP would historically room demand to drop 4%. The latest forecast defies this norm.

Four reasons travel is uniquely positioned for this downturn

- Momentum is still evident
- Households (and businesses) are in a fiscally strong position
- Pent-up demand is prioritizing travel
- Business travel both group and transient continues to rebuild

4 The travel outlook

The 2023 outlook was revised downward but we still expect growth across all segments

5 Local travel outlook

Recession fears and workforce challenges may hamper demand and ADR growth, but North Carolina is well positioned to overcome these challenges.

Historic Lodging Tax collections | YOY | Calendar Year

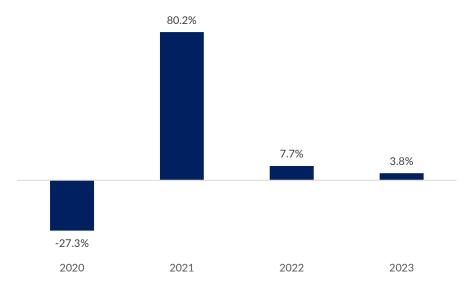

Lodging Tax revenue in Asheville & Buncombe County

Source: Explore Asheville

Lodging Tax revenue in Asheville & Buncombe County

Y-Y percent change

Baseline Scenario: Mild recession in 2023

Why?

- Fed's tight monetary policy
- Past tightening in financial conditions
- Household and corporate balance sheets strong
- GDP will fall 1% during the recession
- 0% growth for the whole 2023

Downside Scenario: Recession in 2023

In This Scenario...

- Central bank credibility is threatened by the ongoing period of elevated inflation
- Despite the rapid central bank tightening, cost and price pressures remain elevated
- Financial markets are rocked
- As sentiment worsens, a broad-based US dollar appreciation ensues
- The global economy slows, reflecting in part a persistent squeeze on households' real disposable income
- US GDP declines 0.6% and inflation moderates to 5.5%

Upside Scenario: Recession Avoided in 2023

In This Scenario...

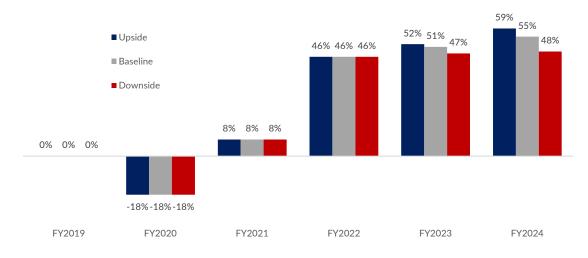

- Inflationary pressures ease markedly
- Supply-chains normalize more quickly than expected
- Business and consumer confidence improve, aiding the recovery in demand
- US GDP increases by 1.0% and inflation moderates to 3.9%.

Lodging Tax revenue forecast
